Accessory for transforming the DAT 1400 & DAT 400 from DIN rail to panel mount

Sturdy, practical and durable

Possibility of customization

System composed of stamped plate in self-extinguishing plastic complete with threaded inserts M4

External dimensions 144x72mm with 7mm thick

Supplied with plastic rods for panel mounting with thicknesses up to 4mm

The kit comes with the 35mm DIN bar already set on the transmitter DAT 1400 (DAT 400)

The installer will have to practice only a rectangular drilling from 126x46mm

In case the installation requires a higher degree of protection IP20, a plastic accessory is provided able to ensure protection up to IP65
